

# Mission Statement and Philosophy Questionnaire

Thinking back, what was the first program you developed and why did you start it?

What are the three most important things that you would like to do to add Quality of Life to clients?

If a client were to talk about your new program, what do you think they would say?

If a staff person were to describe your new organization, what do you think they would say?

What would an agency, (Regional Center, hospitals, etc.) say about your new program?

From your thoughts above, list the several key words that would describe your “mission” to develop this program?

Using your key words and your description of those words, create your mission statement and philosophy.
